Newscaster was reported. The damage in the
Third District was quite extensive and the
mass transit schedules are still largely
affected.

Moreover, the Bumaz which terrified the
citizenry today were the Combat-use type
mercenary robot whose production is
strictly prohibited in this country....

It is also feared that many other Bumaz of the
similar type may exist today, so that the
strict security is required in the city.

Afternoon
Genom Building

Quincy

The government has granted permission to
the Genom Group to proceed with our Technology-
Intensive-Urban-Development Plan.

Quincy

We intend to buy up the entire Third District and develop it into a modern Commercial City. The Genom Group will occupy the city and use it as a base for our foreign expansion.

Also the Twelveth District which fell behind in restoration effort in recent years will be developed into an industrial section.

Thus these two Districts will be our first phase of development.

Participant at the meeting
listening to Quincy
intently

Mason (off)

The residents of the Third District are fed up with the bad security situation. I would think it's a matter of time many of them will begin putting up their properties on sale.

Quincy

I am counting on you. Don't ever foul up again. Try not to disappoint me too much.

Mason

I am very aware of that, Sir.
